HATCH	HC242PS/UV/D
HOWARD INDUSTRIES	EP2/13CF/MV/2
HOWARD INDUSTRIES	EP2/26CF/MV/2
HOWARD INDUSTRIES	EP2/42CF/MV/2

Using a lamp/ballast combination that is not compatible may lead to product failure that results in dangerous conditions and could cause property damage or personal injury.

Universal Douglas LED replacement lamps have been tested for compatibility with the ballasts listed on the chart (by Universal Lighting Technologies). **However, due to product changes by manufactures, compatibility is not guaranteed.** It is recommended that projects have test samples installed onsite. The ballast manufacturers listed have neither performed nor confirmed our testing results.

Universal Douglas will periodically update this list as more ballasts are tested. If a ballast does not appear on this list, it does not mean that it is not compatible. Please contact Universal at 1-800-225-5278 if you have any questions or concerns.
